

SETUP GUIDE FOR DALLARA F317 : ADAPT A BASELINE SET TO YOUR STYLE

F3 Authors: Luca Varani and the iGPFun league (<https://www.igpfun.com>), Robert J Hopkins. Original Author : LmS Version : July 2020 (2020S3)

This Setup guide for the Dallara F3 iRacing car aims to provide a simple and accessible approach for a pilot with basic knowledge. This guide, presented in table form, covers the different settings that can be adjusted on your car, by step. The ideal starting point to work from is a balanced Baseline setup, either from iRacing or elsewhere; the emphasis is on 'balanced'. It is extremely important that you drive lap after lap consistently, without mistakes. You want to evaluate the car behaviour, not your driving errors. You do not have to push to the limit to start working on the setup, quite the opposite. Once you can lap consistently, go through the guide step by step, modifying one parameter at a time. Save the setup after each step with a new file name.

Each time you change something you have to drive a few laps (at least 3 or 4) to validate its positive or negative effect on the INDICATORS column. The ACTION column describes the changes to the car that will help dealing with the INDICATOR.

The whole process is iterative, after each change you might want to re-evaluate some of the steps above it. Each STEP's difficulty is indicated by the color in the right-most column.

STEP	ELEMENT	INDICATOR (Information or Component to change)	ACTION (to take)	Difficulty
			<div style="display: flex; align-items: center;"> <div style="margin-right: 20px;"> <div style="width: 20px; height: 20px; background-color: #90EE90; margin-bottom: 5px;"></div> Easy Adjustment</div> <div style="width: 20px; height: 20px; background-color: #FFD700; margin-bottom: 5px;"></div> Medium Adjustment</div> <div style="width: 20px; height: 20px; background-color: #FF0000; margin-bottom: 5px;"></div> Difficult Adjustment
